What is the Gender Ideology?

Men and women are identical.

Except women are better.

Therefore:

Wiping out all differences between men and women is a moral imperative.

Examples of this version of the Gender Ideology

- Title IX: equality in sports programs.
- Physical fitness requirements for law enforcement officers.
- Women in military combat roles.

More Examples:

- Single-sex educational programs: “sex stereo-typing” prohibited.
- Government subsidizes women in “STEM” disciplines: Science, Technology, Engineering, and Mathematics.

Are Men and Women Really Different?

More male than female:

- (120 to 100) embryos are conceived
- Stillbirths
- Perinatal brain damage
- cerebral palsy
- congenital deformities of genitalia and limbs
- premature birth

At birth, natural sex ratio of 105 boys to 100 girls

“Male privilege “

Little boys more likely:

- Autism spectrum
- Clumsiness
- Tourette’s Syndrome
- reading delays
- Hyperactivity
- Stammering
- Conduct and oppositional disorders
- Disruptive in school
- “Developmentally delayed at birth.”

Little boys more vulnerable to stressors in their environment:

- Mother under age 19
- Too much day care
- Mother-only homes
- This cannot all be “socially constructed.”

Gender Ideology:

It didn't just sneak up on us.

- De-gendering going on for a long time.
- Heartbroken Career Woman
- Postpone childbearing
- Apologize for motherhood
- Men expected to be assistant moms, rather than dads.
- Boys expected to sit still in school.

Managerial Class:

- “No differences” is almost believable.
- Men dominate the “death professions:” 92% of workplace deaths are men. *

My Story

Heartbroken career woman

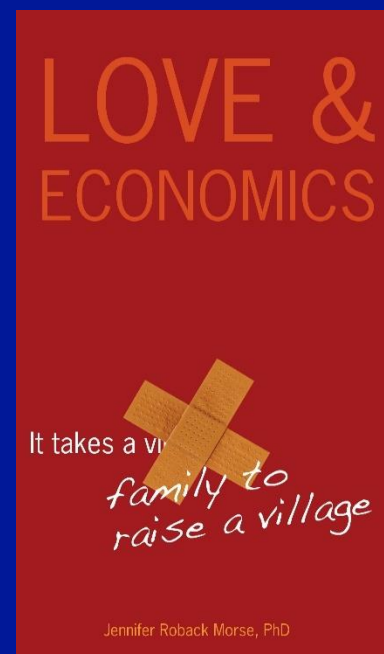

Why she is particularly relevant.

Love and Economics, 2001

- Laid out the basic concepts:
- children need their own parents
- *Development of the human personality depends on mother-child bond*
- *Preservation of the free society depends on the family.*

The gender ideology morphs from:

**Banned: Father-Daughter
Dances**

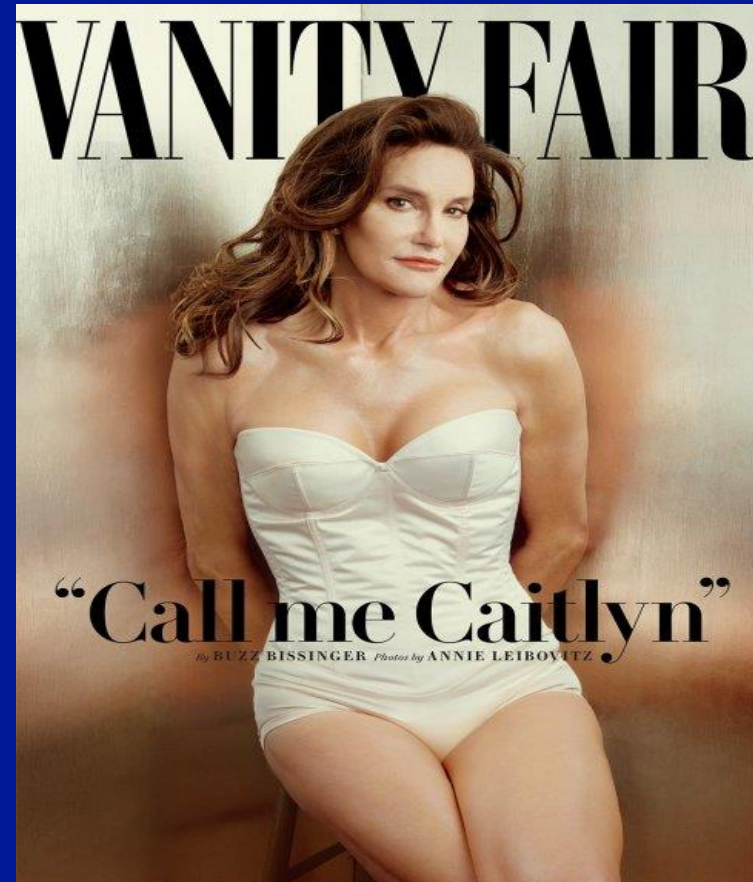

**Required: Gender Neutral
bathrooms**

New gender ideology:

- Wipe out all differences between men and women,
 - Except:
 - ***Those the individual specifically chooses to embrace.***

Bruce Jenner: “Call me Caitlyn.”
Note the stereotypical image of
“femininity:”

“The hardest part about being a woman is figuring out what to wear.”

Contradictory Visions:

Women in Sports:

Title IX used to mandate women's participation, is now the basis for transgender mandates.

Fallon Fox, male-bodied "woman" boxer

“Trans Exclusionary Radical Feminists” = TERFs

- Feminists and lesbians against transgenderism

- <http://www.newyorker.com/magazine/2014/08/04/woman-2>
- (Google “lesbians against transgenderism” and nothing comes up about Sheila Jeffreys.)

A related contradiction:

A person who experiences same sex attraction is “born that way” and must live that way in order to be authentic.

A person who experiences gender dysphoria is not “born that way” meaning biologically male or female. They must change their bodies to match their minds.

How do these 2 versions of the Gender Ideology fit together?

The human body is unimportant, and can be transcended, either

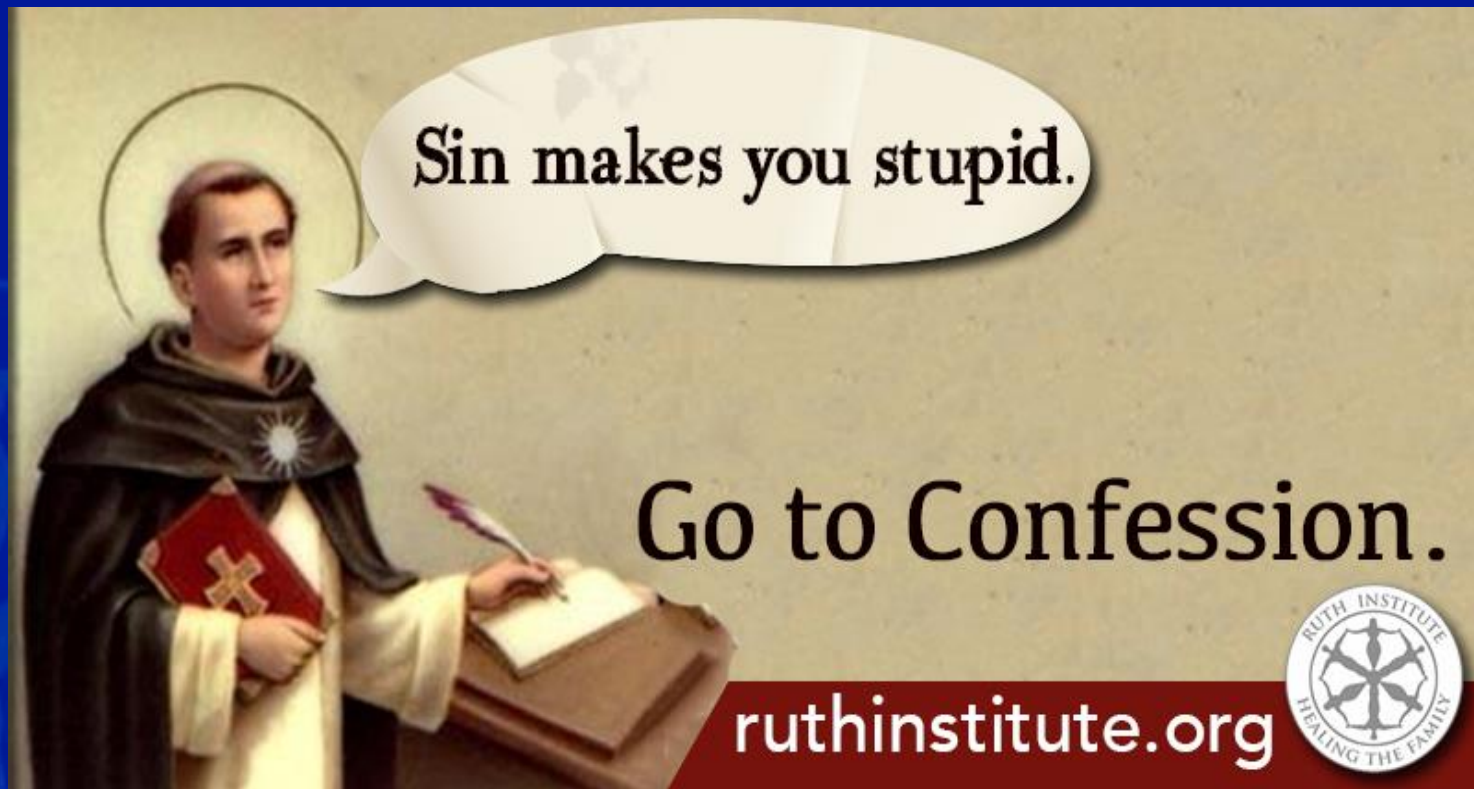

- Through social reconstruction
 - Or
 - Through individual reconstruction
- (with the help of the law and technology.)

Assault on Human Embodied-ness

Assault on Human Embodied-ness

The Sexual Revolution: motives?

- Acquiring power:
- If there is no truth, then might makes right.
- Make people say and believe: “freedom is slavery.”

What about “gay marriage?”

We need to believe:

- *Sex is sterile: The **Contraceptive ideology***
- *Kids don't need their own parents: the **Divorce ideology***
- *The sex of the body is insignificant: the **Gender Ideology.***

This is why we have “Gay Marriage:”

- People have already absorbed these 3 ideologies.

Do we have “Gay Marriage” because ordinary people demanded it?

Invented and propagated by the Elites and the State.

What about Intersex people?

1. Not XX and not XY
2. Klinefelter (XXY)
3. Androgen insensitivity syndrome
4. Partial androgen insensitivity syndrome
5. Classical congenital adrenal hyperplasia
6. Late onset adrenal hyperplasia
7. Vaginal agenesis
8. Ovotestes
9. Idiopathic (no discernable medical cause)
10. Iatrogenic (caused by medical treatment, for instance progestin administered to pregnant mother)
11. 5 alpha reductase deficiency
12. Mixed gonadal dysgenesis
13. Complete gonadal dysgenesis
14. Hypospadias (urethral opening in perineum or along penile shaft)
15. Hypospadias (urethral opening between corona and tip of glans penis)

What about Intersex people?

1. A wide variety of conditions
2. Medically diagnoseable
3. Some not obvious at birth
4. Some are life-threatening. (ex: Congenital Adrenal Hyperplasia (CAH), and cloacal exstrophy.)
5. Some conditions should be watched for possible development of cancer dysplastic gonads, and undescended testicles.
6. They need parental supervision!!

Gender Dysphoria

“Gender dysphoria (GD) in children describes a psychological condition in which they experience marked incongruence between their experienced gender and the gender associated with their biological sex.”

American College of Pediatricians, Position statement on Gender Dysphoria in Children

<https://www.acpeds.org/the-college-speaks/position-statements/gender-dysphoria-in-children>

Intersex vs. transgenderism

1. No medical diagnosis required per Dept of Justice Guidelines.
2. Self-diagnosed.
3. Parental involvement not required and may be prohibited.

(Ruth Institute Statement on DOJ Guidelines)

<http://www.ruthinstitute.org/PDFs/Transgender%20DOJ%20Guidelines%20statement.pdf>

In general:

Intersex is a medical category.

Gender Dysphoria is a psychological category.

Transgender is a political category.

Who benefits from transgender ideology? The State

Young people redefine their gender identities, with or without parental supervision. → separation between children and parents, inserting the State between them.

Anyone redefine their gender identities. → State public enforcer of new identities. (New York has redefined sexual harassment to include failing to use the correct pronouns, fine of up to \$250,000.)

Belgian killed by euthanasia after a botched sex change operation

A Belgian has been killed by medical euthanasia after pleading for death because a botched sex change operation to turn her into a man had resulted in "a monster".

Nathan Verhelst was euthanised on the grounds of "unbearable psychological suffering" Photo:

Insufficient Screening

- Nancy “Nathan” Verhelst: “botched” sex change.
- Not botched in any medical sense.
- Her mother wanted a boy.
- Nancy/Nathan had herself euthanized legally, under Belgian law.
- “Euthanizing the unhappy: the urgent need for love.”

<http://www.thepublicdiscourse.com/2013/11/11113/>

Transgender Reversal

Not screened for issues related to child abuse, including sexual abuse: dissociative disorder.

Walter Heyer “Sex Change Regret” website

The Sexual Revolution:

Is irrational and impossible.

It cannot stand on its own. It requires:

force

propaganda

A pagan ideology that no Christian should have anything to do with.

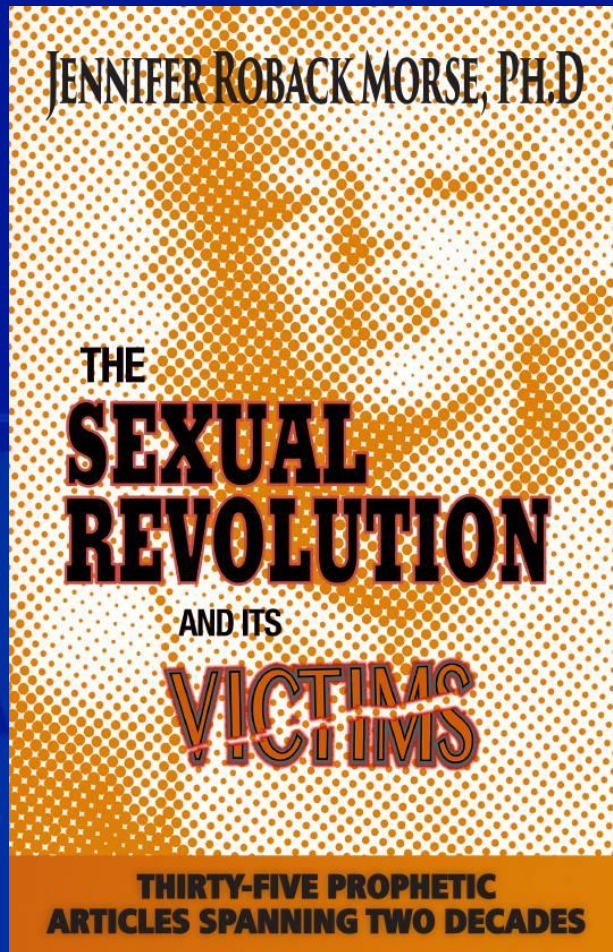

The Sexual Revolution:

Are we being too tough on the pagans?

A ***totalitarian*** ideology that no Christian should have anything to do with.

All these issues create separations among people.
But what we really want is reliable love.

The Sexual Revolution: motives?

- Making money: transitioning is big business
- Having no sexual constraints

*Hasn't this gone on long enough?
Isn't it time someone did something
about this?*

We think it is!!

Ask me what we're doing about it!!

“Put on Love”

- *“And above all these put on love, which binds everything together in perfect harmony.”
Colossians 3:14.*
